EDUCATION

HITEC University   Taxila
Bs Computer Science   *2023-2027*

FG Degree College   Wah Cantt
Fsc Pre Engineering   *2020-2022*

EXPERIENCES

Huawei — Participant   2023
Taxila

- Participated in a Web Development workshop conducted by Huawei in my university. The workshop was related to frontend including core concepts of Reactjs and Nextjs

PROJECTS

Dev-Com | *React, Tailwind, Framer Motion, Firebase , Html, CSS , Javascript*   link

- Excited to share my latest project: Dev-Com!
  Tech Blogs: Developers, unite! Share your insights, tips, and code snippets. Whether its a deep dive into React hooks or a tutorial on GraphQL, Dev-Com is the place to geek out.
  Project Ideas: Got a million-dollar app idea? Post it here! Collaborate, brainstorm, and find your dream team. From AI-powered chatbots to blockchain solutions, lets turn ideas into reality.
  Tech News: Stay in the loop! Read up on the latest industry trends, breakthroughs, and startup success stories. AI, cloud computing, cybersecurityyou name it, we cover it.

Life Drops | *Next js, Mongodb Atlas, Kinde Authentication, Tailwind CSS*   link

- Making Blood Donation Easier! As a proactive student, I noticed a critical issue: the process of coordinating blood donations within institutions was complicated. Students had to go through administrative channels, contacting coordinators or DSA offices. This often wasted time during emergencies. My Solution: A Dedicated Blood Donation Platform Im excited to share that Ive taken action! Im currently building a user-friendly website where: Donors can easily post their availability to donate blood. Recipients can quickly search for donors and connect directly.

ACHIEVEMENT

Blood Donation Website For my University

- I made a Blood Donation/Collaboration website for my university as there was no proper channel for communication between blood donor and recipients, so i recently built Life Drops a blood donation platform which will be used during our university blood donation camps

TECHNICAL SKILLS

Web development : Html5,Css3,Javascript,React ,Firebase ,Tailwind Css ,Framer Motion
Frontend Development: Javascript , React js, Tailwind css, Htlm5, Css3, Framer motion
Full stack development: Next js Node js, Mongodb, Mongoose, Authentication , Api Integrations
